## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of references to claims. See paragraphs [0005] to [0012]. Amendments to claims are often introduced during the prosecution of application; therefore, descriptions in the specification that make references to claims may no longer be relevant or meaningful once an amendment to claims is made. Appropriate correction is required.

### ***Claim Objections***

2. Claims 4-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-8 have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by JP Patent No. 49-41436 ("JP'436").<sup>1</sup>

---

<sup>1</sup> Cited by Applicant.

Art Unit: 1794

5. JP'436 teaches a molded composition comprising a synthetic resin and a metallic glitter wherein the glitter is formed by coating silver with a resin. See claims and page

3.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/83880 ("WO'880") or US 2004-0224586 ("US'586").<sup>2</sup>

Note: Because these two are equivalent, only citations referred to US'586 are used in the rejection.

US'586 teaches a glitter comprising a silver coated with a synthetic resin. The glitter is mixed into an adhesive which is a synthesis resin. Therefore, US'586 teaches a composition comprising a synthetic resin (adhesive) and a laminated film (the glitter) as claimed.

7. Other references are cited as art of interest.
